If you want to experiment with diverse marinades, rubs and sponge mops as well as generating some really tasty accompaniments regarding your summer barbecue parties, for example, you need to be able to pick out a great chefs recipe from a not-so-great one. Many people think that writing a great documentation of how to prepare certain foods together to make a recipe only needs a list of ingredients and maybe how long to cook the dish for. There is so much more to creating great recipes! All the idea takes is to consider how to prepare the food and record it, but it has to be exact, it has to be in a logical order of operation, and it has to be clearly understandable. One thing that basically frustrates people is when theres no clear information about how long the actual recipe is going to take.

Whats truly annoying is when you get half way through a recipe and then see the words put the mix to one part and marinate overnight. If you have been planning a big party, meal or event and had no idea that this chefs recipe was going to take 12 hours from start to finish because it was not clear at first glance, you will know for the next time you cook that you need to make sure you know ahead of time how far in advance you need to collect and combine your ingredients.
